Olympiad on computer science excellent details Published 09/25/2017 15:25

Olympiad in computer science "Excellent" is a great chance for students to show their knowledge and skills that they purchased in school lessons of computer science or independently, studying the computer.

The main task of the "Exhibitory" competition is to increase interest in schoolchildren to information and communication technologies (ICT), to ensure the guys more actively and with the mind to use modern information technologies in the course of study.

We hope that the competition for informatics "Excellent" will be able to help the student to acquire skills that will be needed in the future.

For your convenience, we have developed a modern system for receiving and processing competitive data. All the necessary information is presented in a convenient format.

Competition goals:

1. Award the students and teachers seeking to actively use ICT in the learning process.
2. Carry out schoolchildren with information technology from the very beginning of training at school.
3. Develop the information culture of schoolchildren and their creative potential, as well as train algorithmic and logical thinking.
4. Detect students who are actively and, most importantly, creatively using information technology.
